Implementation and Demo

https://github.com/gabriellet/thepriceisright
https://trello.com/b/J5WehrH2

We were able to demo our system with no problems to our JPMorgan instructor, Lin. Our demo feedback is recorded in the "issues" section of our Github repository. We've also updated the issues such that all the issues you see related to this current iteration have the 'v2.0-demo' tag. Since our system met Lin's original requirements, all the previous issues (tagged with 'v1.0-toy') were closed and marked done/archived on the taskboard. We also added a Wiki to our project. In our repository's "Wiki" page, we've recorded some common bugs we faced during development and troubleshooting tips for them.
